Movable Point Darts

Hammer Head Designed by Walt Bottelsen

The Hammer Head is a "no bounce dart" mechanism with a point that retracts with friction upon impact with the target. This movement forces the point off the wire and into the board.

90% Tungsten
(except where noted)
Packaged in a deluxe case with extra flights and shafts

Number Code:
First two numbers indicate the weight. The last number indicates the barrel grip:
1 = smooth
2 = coarse knurl
4 = fine knurl
E = "new" edge grip
